Introducing

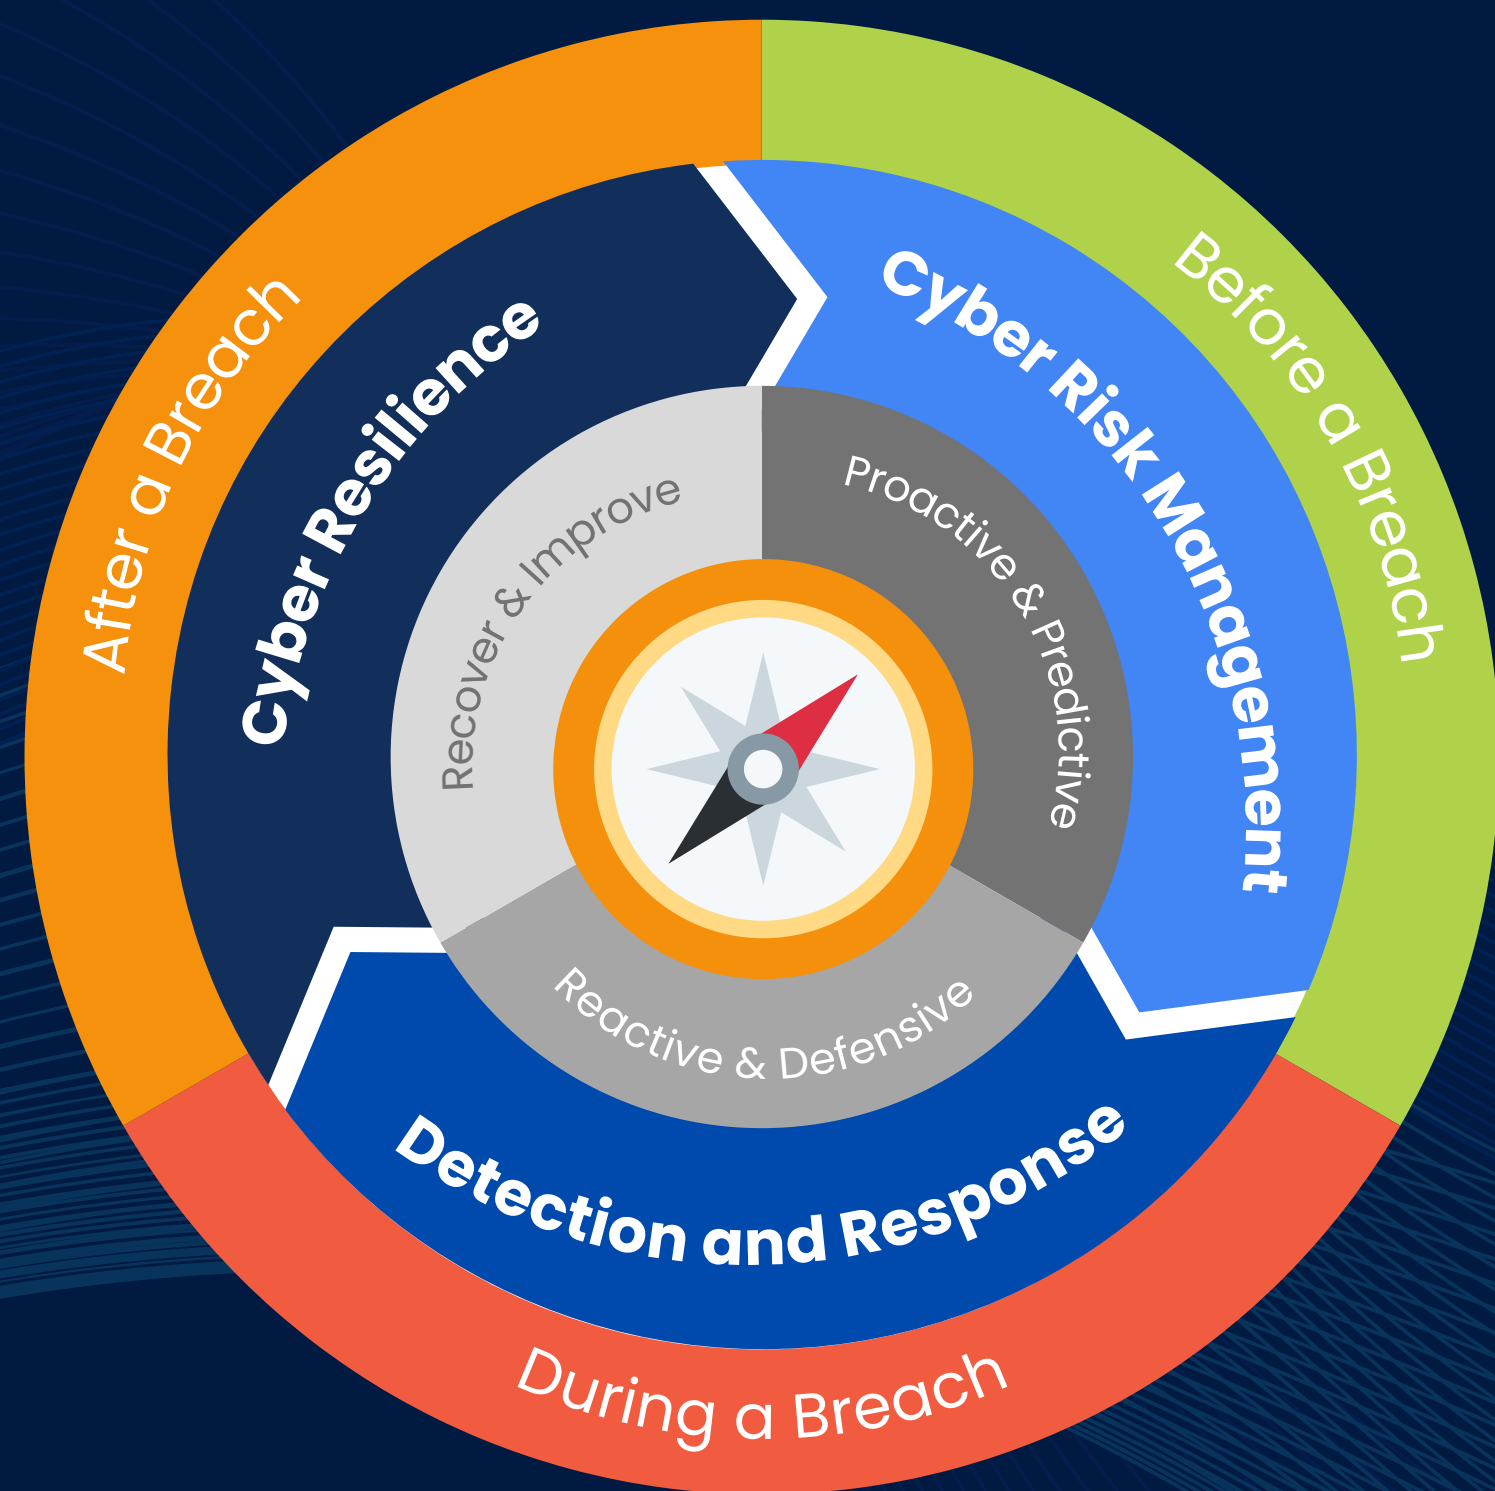

Unified Cyber Management Center

Proactively defending your business from modern cyber threats

A Proactive Approach

In today's digital age, your business is navigating a complex and evolving security landscape. New technologies, shifting compliance requirements, and complex threats are constantly emerging, creating a challenging environment to protect your organization.

**Proactive
cybersecurity
is no longer an
option; it's a
*necessity.***

Introducing *UCMC*:

UCMC is designed to seamlessly consolidate all your data and deliver a comprehensive Cybersecurity Business Program.

UCMC includes the following:

- **Identify Business Risk Areas:** Assess risks related to intellectual property, digital assets, compliance, and regulatory requirements.
- **Develop Maturity Roadmap:** Create a strategic plan based on the NIST (National Institute of Standards and Technology).
- **Implement Cybersecurity Best Practices:** Establish foundational cybersecurity measures.
- **Enhance Security Response:** Deliver advanced capabilities with BlockShield.AI enabling rapid threat mitigation.
- **Implement BCDR (Business continuity and Disaster Recovery):** to minimize business interruption.

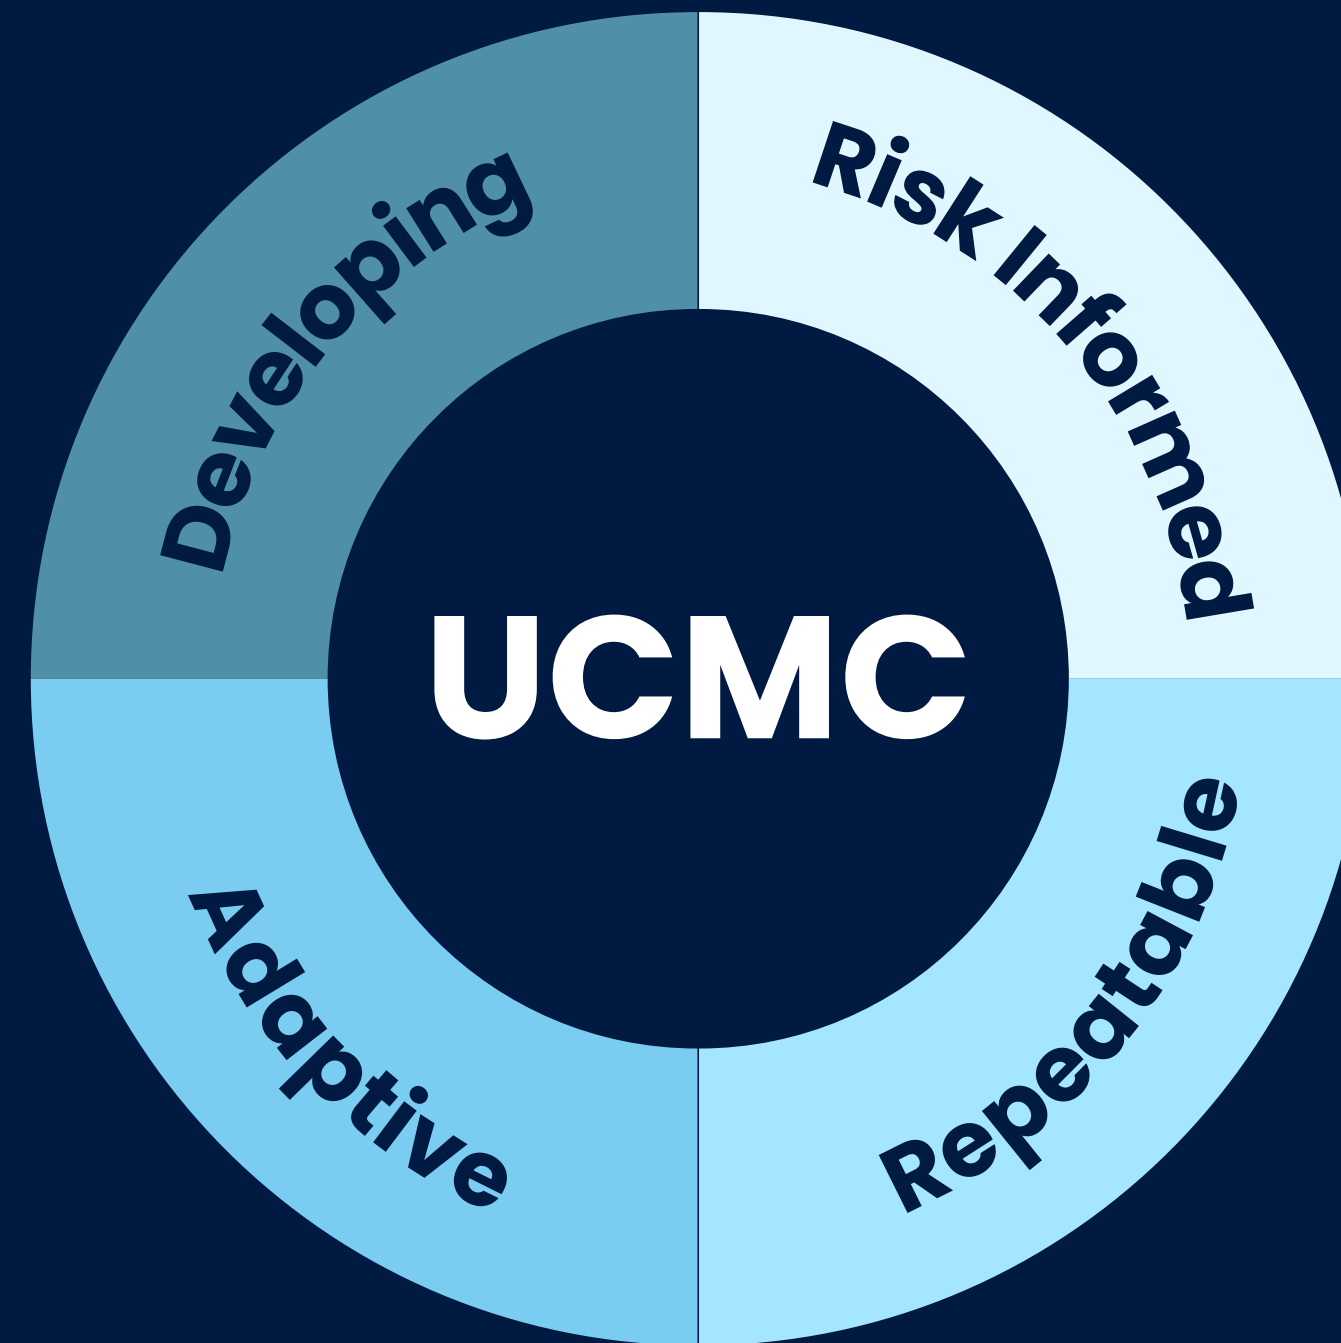

UCMC's Maturity Levels :

Level 1 – Developing:

Your security team has limited awareness of cybersecurity risks, and the implemented cybersecurity program isn't fully integrated yet.

Level 4 – Adaptive:

The security team implements a continuously improving process—such as integrating advanced cybersecurity technologies and practices and actively adapting to an evolving cybersecurity landscape.

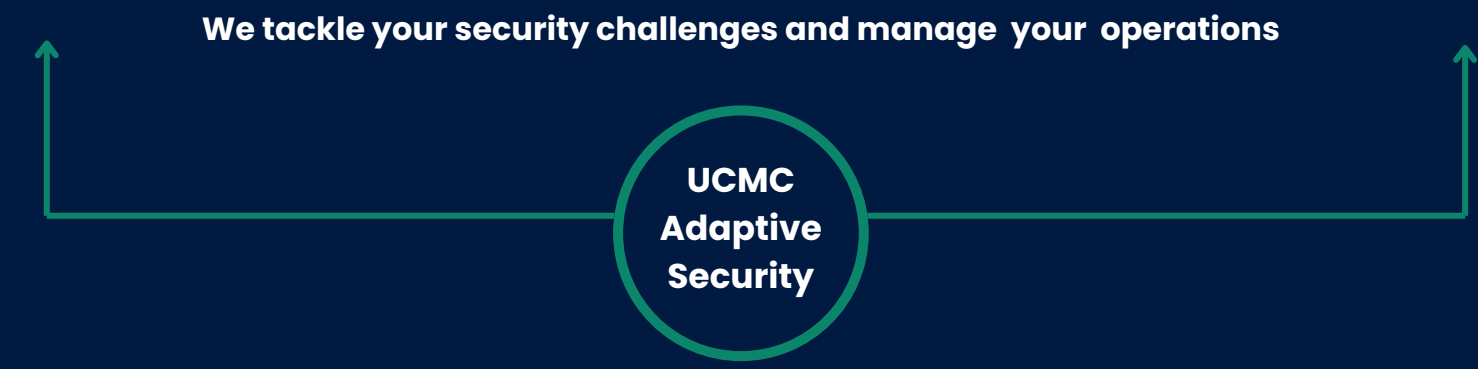

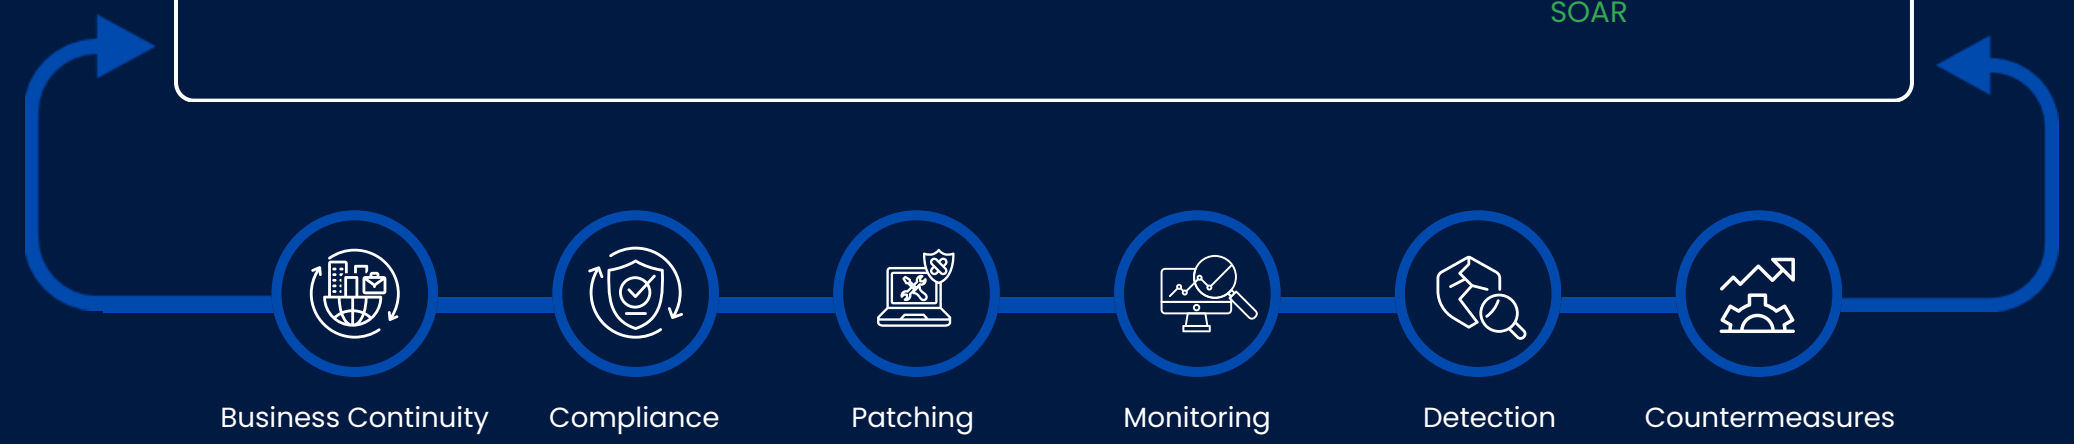

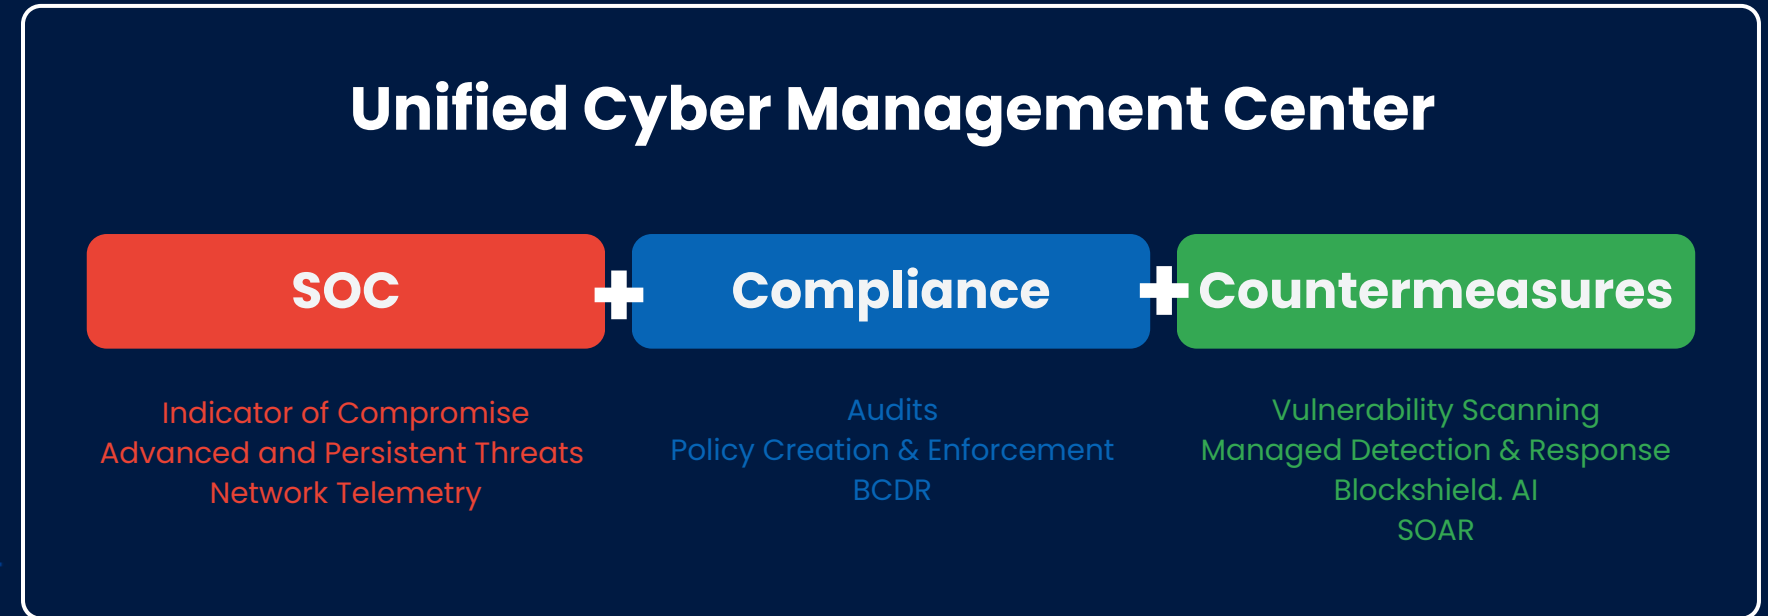

Level 2– Risk informed :

A more comprehensive cyber risk management program is being implemented for your organization.

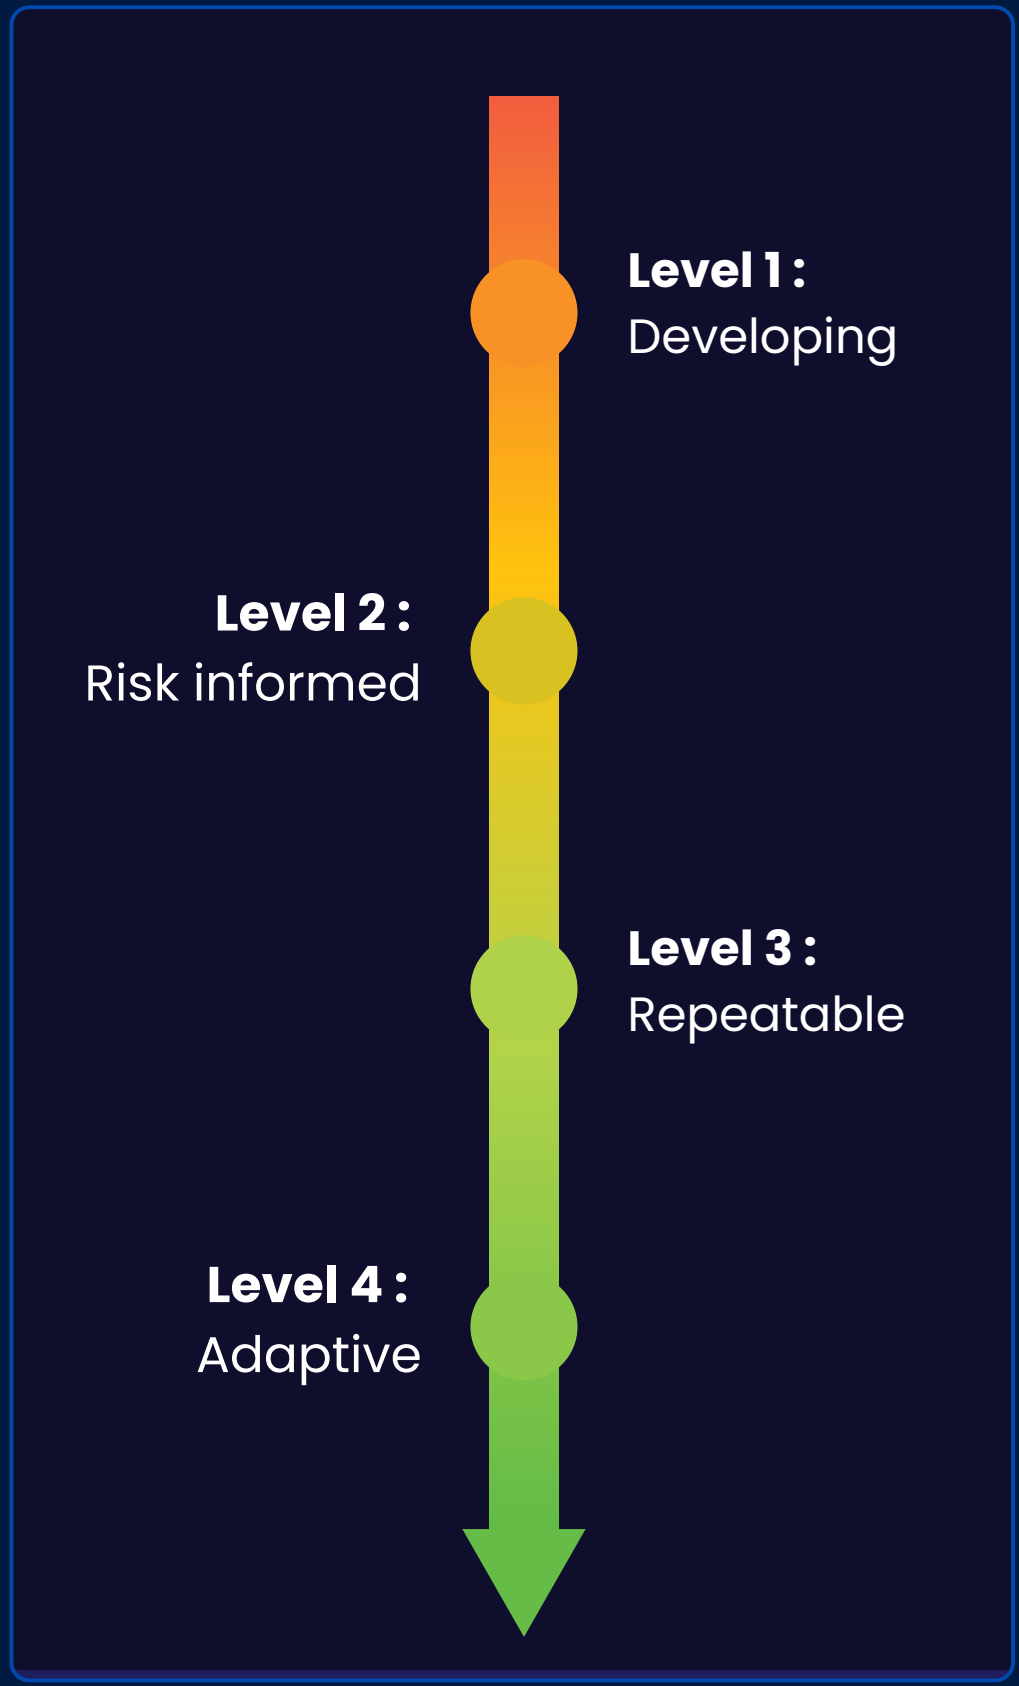

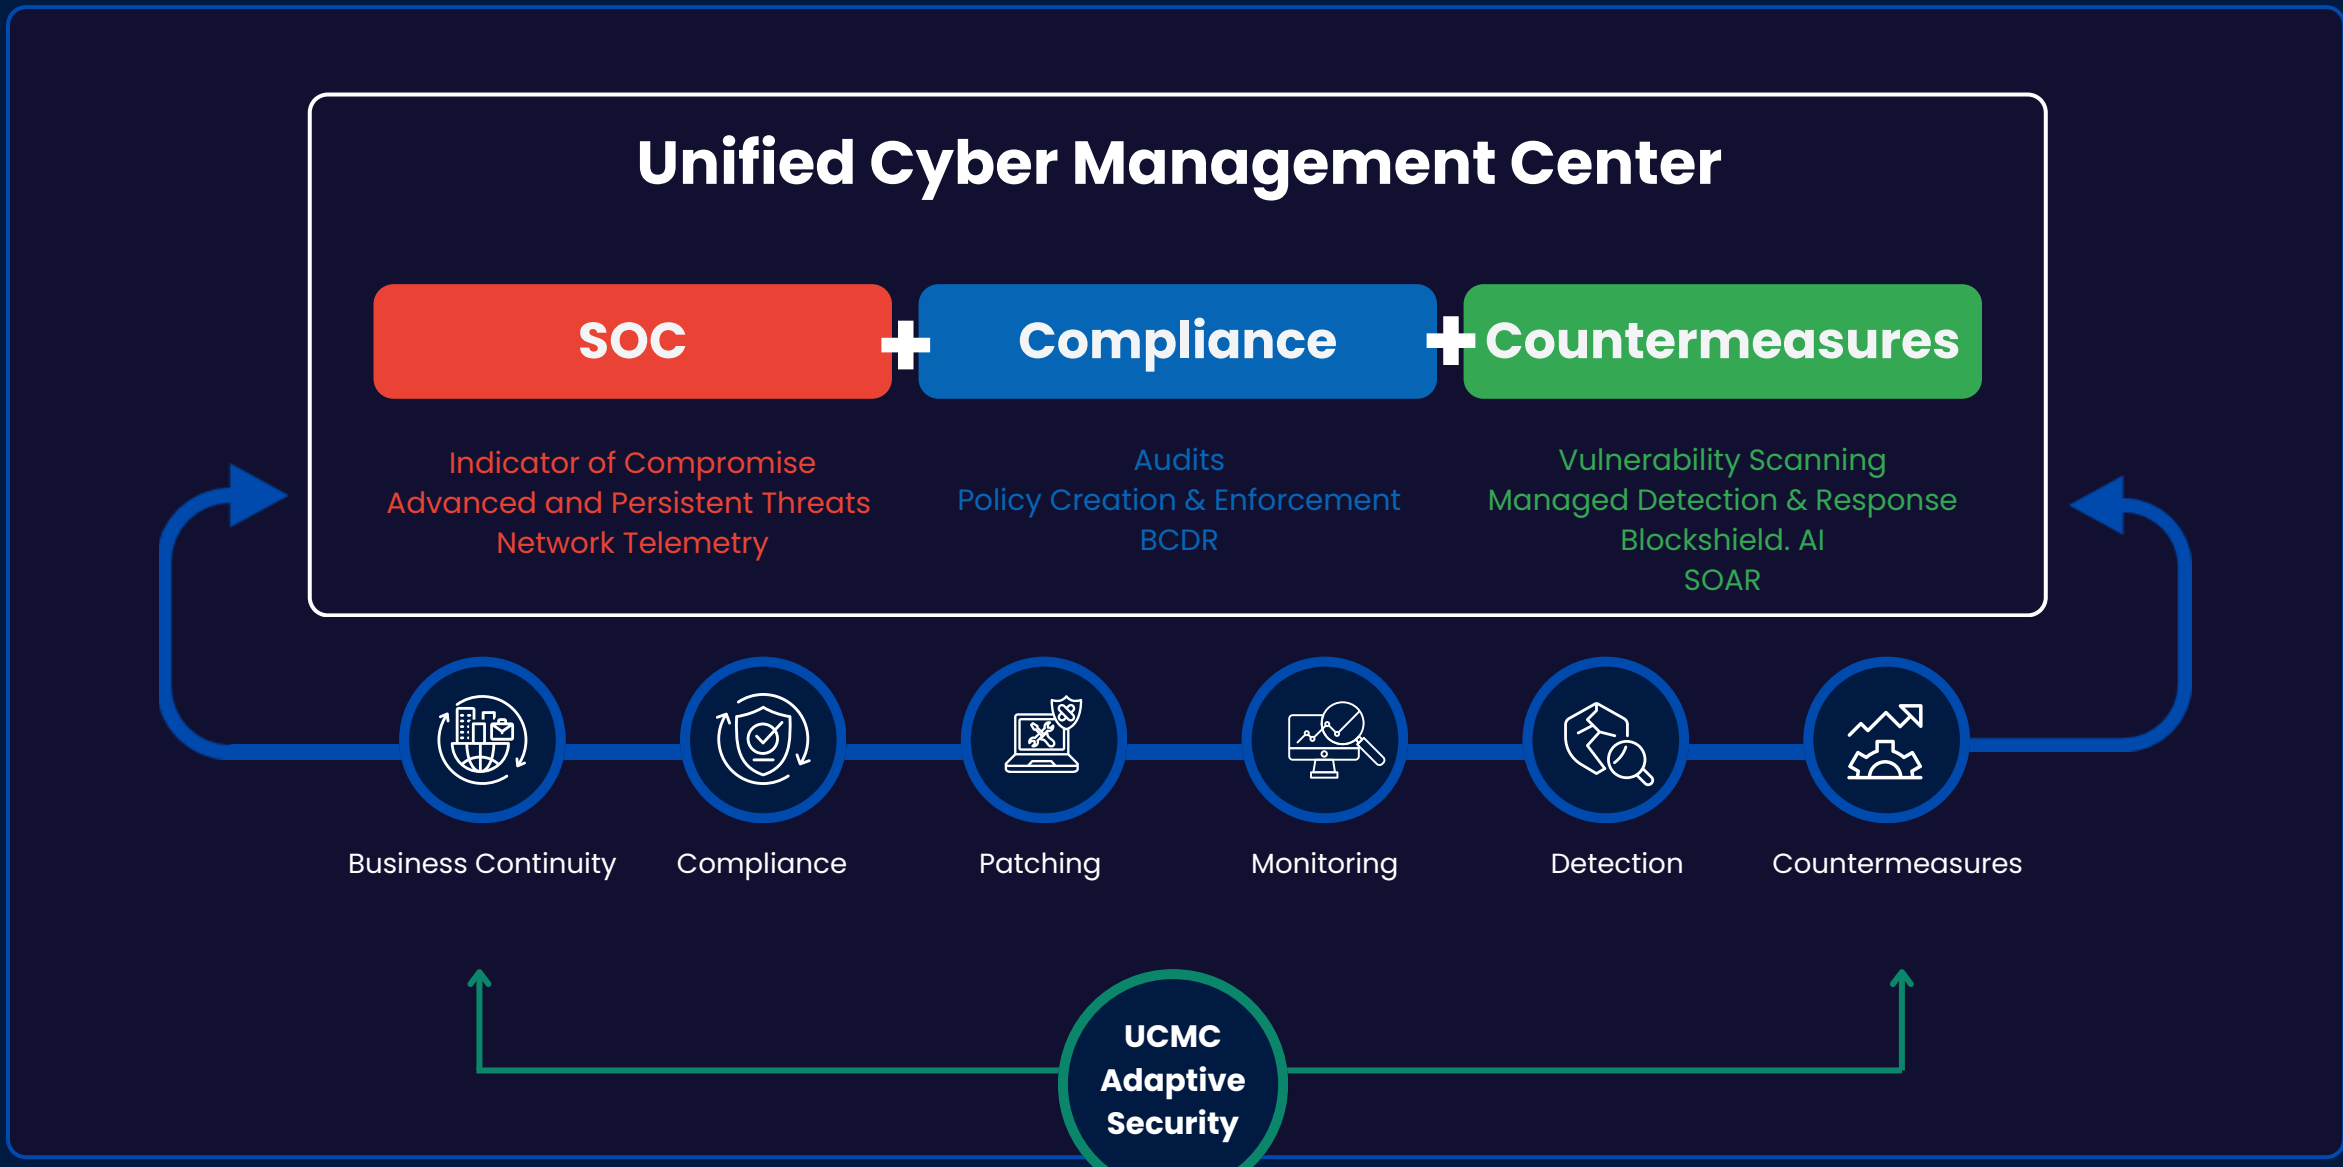

Level 3– Repeatable:

The organization has a structured approach to cyber risk management. A repeatable process for managing threats and a process to address potential threats that could emerge.

All-in-One Cyber Protection with UCMC
